

Quotation: Choviar Tiffin App

Date: July 22, 2026 | **Prepared by:** Ankur Gosar

1. Project Overview

Custom end-to-end food ordering application suite tailored for daily tiffin services, including portals for customers, kitchen administrators, and delivery personnel.

2. Scope of Work

- End-User Portal:** Menu browsing, order placement, and account management (registration, login, order history, and auto-fetching addresses based on mobile number).
- Admin Panel & Kitchen Management:** Tools to set "Tomorrow's Menu", aggregate kitchen order summaries (e.g., total rotis/sabzis), and oversee all incoming orders.
- Delivery Portal:** View assigned active deliveries with customer addresses and real-time status tracking (mark as delivered).

3. Technology Stack & Hosting

- Development:** Responsive modern web technologies for both desktop and mobile devices.
- Hosting:** Deployed via Free Tier services (e.g., Vercel for frontend, Firebase/Supabase for backend), ensuring **zero recurring monthly hosting costs** within standard limits.

4. Pricing

Description	Cost
One-Time Development Fee <i>(Includes Scope of Work)</i>	15,000
Ongoing Hosting Costs	0 <i>(Free Tier)</i>

Note: Future feature additions, native mobile apps, or infrastructure scaling beyond free tier limits will be quoted separately.
